PROFILE

Have you ever tried finding patterns in the most unlikely places like a subway platform? I know I do, to figure out where the train door will open, which always leads me to get off near an exit hence saving time and leading to efficiency. Patterns are beautiful and everywhere and I am always looking out for them, which is why I love clean code. I loved playing around with numbers and I have been making and breaking webpages since I was 12, it has been my passion, it keeps me curious and makes me intuitively pick up new languages and frameworks.

EXPERIENCE

FREELANCE WEB DEVELOPER

May 2018 - Present

SYSTEMS ANALYST

Raj Products Co. | Aug 2014 - Dec 2017

Worked with the tech team for deployment of a tailor-made RDBMS. Proposed and implemented solutions to automate production processing.

Performed Inventory audits on a weekly basis.

Designed systems workflow

Identify problems and requirements from stakeholders and analyzed data for planning new reports

Highlighting, delegating system bugs and manage tasks and projects through online tools similar to trouble ticket system.
