Profile

An aspiring web developer with a strong interest in projects that require both conceptual and analytical thinking. Fully-committed to designing and developing innovative web-based materials that users will love. Always eager to learn more tricks from anyone - regardless of the industry they're working in. I believe that it is only through diligence and hard work that a future can be built and I embrace all of these important traits.

Interests

I am an advocate of Open Data, a tech enthusiast and a full-stack web developer who offers services to variety of clients with their web requirements and deployment. I like to work with Ruby on Rails, React and Django.

I am a frequent micro-blogger, (do check out my twitter) who often posts about what's happening in a day-to-day life.

When I am not working full-time I volunteer for solving civic issues using technology, do yoga and play my Yamaha FG700S acoustic guitar!
