## ABOUT ME

I like to operate in an efficient manner, to find the patterns that generate a clean way of living. This is where my love for code comes in. I've been making and breaking webpages since I was 12 and always searching for that clean and efficient line. It keeps me sharp, engaged and focused. This is my vocation. I have over three plus years of experience working as a software developer for enterprises using the latest and greatest tools such as NodeJS, ReactJS, Python Django, MongoDB. In addition I have formal web development trainings, several projects on my portfolio and a strong appetite of learning new technologies. My passion for solving problems for my teams is what sets me apart.

## MY SKILLS

### LANGUAGES

- \* Ruby & Python
- \* Javascript
- \* Java

### CLOUD

- \* AWS
- \* Heroku

### FRAMEWORKS

- \* NodeJS
- \* ReactJS
- \* NextJS
